MONITOR, ALBERTA, FRIDAY, JUNE 24 1921.

NO. 24

MEMORIAL TABLET IS UN- VEILED IN BANK HERE

A sacred and imposing ceremony took place in the local branch of the Canadian Bank of Commerce on Saturday afternoon last, when a Bronze Memorial Tablet, erected in memory of those who had joined at the Monitor Branch of the bank, was unveiled.

P. Moth, Esq., J.P. Reeve of the Village of Monitor occupied the chair, assisted by the Manager, J.C. Matheson, Esq., and the Rev. W.S. Wickenden and Rev. E. Davidge.

Mr. Matheson briefly outlined the idea of the Bank in having these tablets erected, one of which appears in every branch of the Canadian Bank of Commerce where members of the staff joined the colors. He stated that out of a personnel of 2400 no less than 1700 had volunteered, from purely patriotic motives, to fight for their King Country and Right, and 258 of them laid down their lives. Mr. Matheson pointed out that while Monitor only had three names on their tablet, yet at the time of their enlistment, the number of the staff was very small. He also drew attention to the fact that two of the three had made the supreme sacrifice.

Rev. Davidge then spoke very feelingly on the part the Canadian Bank of Commerce had paid in the great War, and gave a brief resume of the motto of the bank, and what it stood for.

The Chairman, Mr. Moth,

then gave the history, briefly, of those members of the local branch who had joined the colors here, and Rev. W.S. Wickenden brought the ceremony to a close with prayer.

It is interesting to note that the Canadian Bank of Commerce, has 500 branches in Canada, and in each Branch, a tablet, similar to the one unveiled here, is situated. In addition to this, the Bank has issued a handsomely bound volume, called "Letters from the Front". This interesting book, consisting of about 400 pages, is a record of the part played by officers of the Bank in the Great War. Copies were presented to each Branch Managers, and prominent Canadian citizens, and in all some 1000 copies were distributed. It is the intention of the Bank to also publish another book, giving the autobiography of these "soldier bankers".

We give hereunder the "Military history" of these men from Monitor.

FISHER, IVAN MYRRILL—Lance-Corporal. Born 29th November, 1894, at Killarney, Manitoba, Canada. Father, Frederick Fisher. Educated at Great Falls, Montana, Public School, and Red Deer, Alberta, School. Entered the service of the Bank, 27th January, 1911. Enlisted, 25th October, 1915, from Monitor branch, in 51st Canadian Battalion, with the rank of Private. Transferred to 7th Canadian Battalion, upon arrival in France, 11th May, 1916.

Died of Wounds, 16th August, 1917. NOTE. Private Fisher was employed as a despatch carrier at the time of his death. He was recommended for the Distinguished Conduct Medal for his gallantry on the morning of 16th August, 1917, when he crossed the enemy barrage eight times. He was severely wounded in the head, body and legs, and did not recover consciousness. He died at No. 7 Casualty Clearing Station.

GILLESPIE, Victor Allan—Private. Born 3rd August, 1890, at Monaghan, Ireland. Father, Joseph Gillespie, Provision Merchant. Educated at Silgo Collegiate School. Entered the service of the Bank, 21st June, 1912. Enlisted, 1st December, 1915, from Monitor branch, in 2nd McGill

University Company, Private. Severely wounded in the chest.

Died of Wounds, 1st October, 1917. Buried at Ambigny Cemetery, France.

WALKER, ROBERT LEE—Second Lieutenant. Born 30th September, 1897, at Amberley Ontario, Canada. Father, Robert Walker, Farmer. Educated at School Section No. 12, Ashfield Ontario. Britannia High School, Vancouver, B.C. Entered the service of the Bank, 11th January, 1916. Enlisted, 4th January, 1918, from Monitor branch, in Royal Flying Corps, with the rank of Flight Cadet. Transferred to R.A.F. April 1, 1918. Promoted 2nd Lieutenant October 18. Served as Flying Instructor in the R.A.F. in Canada. Demobilized, 31st January, 1919.

and might add also that the present staff contains the following members late of His Majesty's Forces.

J.C. Matheson, Joined at Medicine Hat, on August 10 1914, in the 10th Canadian Infantry Battalion as Private, rising to the rank of Major. Was returned to Duty Oct. 25th 1919 after winning the Military Cross.

D. S. Waters Joined on Jan. 17th 1918 in the 1st Depot Battalion Alberta Regt. as a Private. Was returned to duty Nov. 25th 1919

James Taylor Joined August 10th 1914 in the 8th Canadian Infantry Battalion. Was prisoner of War from April 21st, 1915. Was Returned to Duty March 1919

The ceremony was witnessed by about 40 of the citizens of Monitor and District and all were deeply impressed with the part the Canadian Bank of Commerce, as a whole and individually, played in the Great War.

Friday July the 1st Dominion Day Bank holiday

R. McLaren left on Wednesday for Lamont, Alta.

The Rev. Mr. Davidge has been busy taking the census this week.

Watch For Our
New Serial Story

Do not Miss the Opening Chapter of "The Homesteaders" appearing in an early issue.

Nearly everybody has heard of the fame of the Canadian author, Robert J.C. Stead, who is not only one of Canada's best writers of fiction, but is an author who has written most intimately concerning life and conditions in the prairie west.

We have been very fortunate in securing the serial rights of one of Mr. Stead's best books, "The Homesteaders". The first installment of this story will appear in an early issue. Readers of "The Homesteaders" will feel instinctively that the author is a man who has lived among the people of whom he writes. We commend this story to our readers. Watch for the opening chapters. If you are not a regular subscriber to this paper, now is a good time to send in your subscription, so that you will miss no part of this interesting serial.

Our readers in Provost and district will be pleased to learn that Mr. R.C. Humphrey is still very much in the land of the living at Vancouver. We very fortunately met him while we were there a short time ago, and spent a very pleasant hour or two discussing old times. Mr. Humphrey sends his regards and best wishes to his many Provost friends.

While in Calgary recently, we met the Rev. and Mrs. Wright who sent their best wishes to their Monitor friends. Both are well.

Mrs. A. Grace left on Wednesday last for an extended visit to Toronto.

A meeting of ALL COMMITTEES connected with Sports Day will please be present in the Big Hall at 8.30 to night, for the making of final arrangements. It is important that every committee man be there. J.C. Matheson, Chairman

Do Your Ears Buzz? Have You Headaches?

When your ears ring, your head aches, and you seem slightly hard of hearing, beware of Catarrhzone Co., J. A. Hamill, manufacturer from Greenmount. He was similarly troubled, and writes: "No one could have worse Catarrh than I, bad for years. It caused partial deafness, bad taste, upset my stomach, made me sick all over." Catarrhzone cleared my nostrils, stopped the cough, and gave me a clear feeling in my breathing organs. I am now absolutely well, thanks to Catarrhzone." Nothing so certain as a Catarrhzone Inhaler to strengthen a weak throat, to rid you of Bronchitis, to drive out Catarrh, colds, & coughs. Sold everywhere, 25c, 50c and One Dollar for complete two months treatment. Dealers, The Catarrhzone Co., Montreal.

"Your Teeth"

By Rea Proctor McGee, M.D., D.D.S., Editor of Oral Hygiene.

CHILDREN'S HABITS.

Copyright, 1921, by Rea Proctor McGee.

Habits formed in childhood are very difficult to break. The younger the child, the more quickly a habit is formed.

Their experience having been so limited, they very quickly become accustomed to almost any new diversion that may come their way. Many little things that, at the time, seem trivial, will have a severe effect in after-years.

One of the worst habits that a young child forms is that of thumb sucking. Many mothers would rather have the baby quiet than disturbed with life in general and raising Cain. But the pacifying of the youngster by this method will cause a great deal of difficulty.

When a child sucks its thumb it pushes the roof of the mouth upward so that it makes a very high arch; and as the roof of the mouth is the floor of the nose, the nasal space is reduced and the septum of the nose is pushed over either to the right or to the left—usually to the left.

The upper teeth in front, along with the bone in which they are imbedded, are pushed forward and upward, and the lower front teeth and the surrounding bone are pushed inward and downward.

Medicated dentifrices should not be used by children. What they need is just thorough scrubbing of the teeth twice each day with clean water and a mild, pleasant tooth paste or powder.

WHEN WOMEN SUFFER

Look for weakness or ill-health. See if there is not a side ache, headache, restlessness, and the "blues." The symptoms indicate that you need the gentle assistance of Dr. Hamilton's Pills. This soothing medicine is a great friend to womankind. They are a wonderful relief to constipation; they clear up sick headache, remove wastes and poisons from the system. Girls and women can use Dr. Hamilton's Pills with entire safety. You should use no other medicine and rely solely upon Dr. Hamilton's Pills to regulate the system and keep it in smooth running order, 25c all dealers or The Catarrhzone Co., Montreal.

Then It Happened.

"Sure you would!" mused the Cheerful Idiot.

"Sure you could what," demanded the Wise Guy.

"Why if a couple of deaf mutes are on their honeymoon, say that they are unspeakably happy can't you?" replied the Cheerful Idiot.

Four Men Manage Huge Business

MacDonald Tobacco Co. Shunned Letter Writing and Telephones.

Recent circulation and disproval of an unfounded rumor to the effect that W. C. Macdonald, Reg'd., Inc., has been acquired by the Imperial Tobacco Co., recall an industrial history which is perhaps the most remarkable in the chronicles of Canadian business. In these days of gigantic corporations (among such the Macdonald Company is to be considered as one of the largest manufacturing enterprises in Canada), we seldom think of a "one-man business" otherwise than as a good prospect for the assignee; yet the Macdonald institution has always been, still is and will continue to be during the lifetime of its present owners, at any rate, a one-man business in the strictest sense of the term.

The largest producers of plug tobacco in this country and now among the largest tonnage of cut tobaccos, it employs an office staff of five persons! Modern business men, recalling personal experiences, may be inclined to scoff this statement, but it is none the less true. A business aggregating many millions of dollars annually is transacted by five office employees. This condition, presumably, is a survival of the form of efficiency for which that enigmatic, taciturn business genius, the late Sir William Macdonald, was distinguished. In fact the spirit of the late founder still looms large in the conduct of the company's affairs.

William Christopher Macdonald founded his business of tobacco manufacturer in 1888, and since that time the name Macdonald has been one to conjure with in this country. Because in his later life he consistently refused to take cognizance of such modern adjuncts of business as the telephone, the office building elevator, the automobile, etc., it has been alleged that he was not a progressive individual, but his success affords ample disproof of such a contention—a success unparalleled, perhaps, in the history of Canadian business, a success such as enabled him to be, next to the late Lord Strathcona, Canada's greatest philanthropist. In the person of his secretary he found a talent like to his, and that talent, transmitted to the sons of the secretary, Howard and Walter Stewart, still controls, solely, the business of W. C. Macdonald, Reg'd., Inc., for to these two men Sir William left the wonderful enterprise he built up.

While the Stewart Brothers have recognized the merits of advertising with the result that their company is today one of the biggest advertisers in the Dominion, while they have taken cognizance of the automobile and of modern equipment, it is none the less true that the industry they control is still guided, and will be during their lifetimes at least, solely by the spirit and unrivaled commercial wisdom of the late Sir William Christopher Macdonald. Hence, any rumors of the purchase of this business by other interests are at once untrue and illogical.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a safe and certain medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

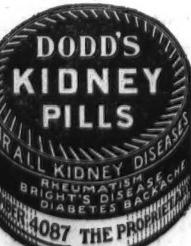

Ore Sent To California

Regulations Forbidding Export For Smelting Are Waived.

About 3,000 tons of silver-lead ore, which has been mined in the Mayo district of the Yukon, is to be sent to Selby, California, for smelting. An order of the governor-in-council has allowed this export, despite regulations of the department of the interior that such ore shall not be mined unless it can be refined in Canada. This exception has been made in view of the fact that there are at present no Canadian smelters who are prepared to accept the shipment for treatment.

When Baby Complains.

THERE ARE MANY WAYS a baby has of expressing any pain or irregularity or digression from its normal condition of health and happiness. A short sharp cry, a prolonged irritated cry. Restlessness, a constant turning of the head or of the whole body, fretful. In these and other ways a baby tells you there is something wrong. Most mothers know that a disordered stomach, or bowels that do not act naturally are the cause of most of baby's sufferings. A call for the doctor is the first thought, but in the event of any delay there should be ready at hand a safe remedy such as Fletcher's Castoria.

Castoria has been used for baby's ailments for over 30 years and has merited the good will of the family physician in a measure not equaled by any other baby's medicine because of its harmlessness and the good results achieved.

And remember this: Castoria is essentially a baby's remedy and not a cure-all for every member of the family. What might help you is too often dangerous when given to a babe.

Children Cry For

Fletcher's

CASTORIA

Let's Think It Over.

There is such a thing as saying too much on any subject, and the "grandstand" talker sooner or later becomes a bore. The truth is always welcomed, and the truth reiterated and confirmed is more than welcome—it reaches your innermost soul.

Fletcher's Castoria is all its advertising has claimed for it. Scrutinized by the microscope of public opinion and used for over thirty years it stands without a peer in the hearts of thoughtful, cautious, discerning Mothers. And once used, mother love—there is no substitute for mother love—will scorn to try a "substitute" or a "just-as-good".

Masquerading under many names drugs that are injurious to the tender babe have found their way into some households, but the light of experience soon casts them out. Are they cast out before it is too late?

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

THE CENTAUR COMPANY, NEW YORK CITY.

If the whole of the watery vapor in the atmosphere were to fall at once in the form of rain it would not, according to experts, cover the entire surface of the earth to a depth of more than five inches.

Man's Greatest Asset

The universal membership enrolment campaign recently conducted by the Red Cross Society throughout Canada had for its object the arousing of the people to the vital need of greater personal interest in the matter of health. It was not a campaign to raise money, but a Dominion-wide and well organized effort to secure an active and intelligent public interest in measures for the prevention of disease, it being realized that an ounce of prevention is worth many pounds of cure. The average man, woman and child gives little heed to their physical well-being until they are afflicted with some ailment; and then there is a hurry-up call for a doctor.

That there is need for a great awakening on the part of the public in regard to matters of personal hygiene and public health was demonstrated by the enforced medical examination of men for military services during the war years, but, startling as were the disclosures from those examinations, even more staggering are some recent figures and opinion contained in an article in The Journal of Health and Sanitation, written by Dr. J. H. Kellogg, superintendent of the famous Battle Creek Sanitarium.

Races of men have sometimes died out and utterly disappeared and Dr. Kellogg is of the opinion that this may happen to the whole human family if we continue to live under what he considers present unnatural conditions. Man, says Dr. Kellogg, is a very old-fashioned animal trying to live in a new-fangled way, in a manner that no animal ever before adventured, and so unnatural and so ill-adapted to his constitution and his requirements as to render his ultimate undoing inevitable. Man is by nature an open-air dweller. But the business and professional men, incarcerated behind the doors of their offices, with their assistants, die years before their time, and, on the average, twenty years sooner than the farmer whose vacation keeps him in the open.

Present-day habits and methods of living are held accountable for the physical deterioration of the race, and for the prevalence of diseases which are carrying off people by the million. According to Dr. Kellogg, the United States loses from its population of 100,000,000 by death 1,500,000 people every year, while 3,000,000 people are sick all the time. In other words, one-fifth of the population are inefficient or lost. He estimates that an average of seven days are lost from labor by sickness every year. Tuberculosis is gaining ground, and kills one out of every ten of the population. Cancer kills one in twenty. Other maladies are rapidly gaining ground. In England and Wales the insane are increasing twice as fast as the sane, and in France ten times as fast. Coupled with these alarming symptoms, there is the serious fact that the birth rate in nearly all civilized countries is rapidly declining.

Dr. MacNeill, superintendent of the Mental Hospital at Battleford, Sask., made the statement recently in a public address at Regina that at the present rate of increase of mentally deficient people there would not be enough mentally efficient people to look after them fifty years hence.

In support of his contention that present habits and methods of living are responsible for existing conditions, Dr. Kellogg draws attention to one of the interesting lessons from the war, namely, the notable lowering of the death rate in several countries. In Denmark the death rate fell 35 per cent., due in the opinion of Dr. Hindhede, the Danish food controller, to simpler habits of living, and especially the low-protein diet and the use of coarse bread. In Germany, too, diabetes has practically disappeared from the same cause, and, gout, formerly very common, is now unknown.

Good health is the greatest asset any person can possess. Wealth is of little value to a man if he does not possess good health so that he may enjoy it. Without health no one can get much pleasure out of life. Lack of health no person can be wholly efficient. Ill-health is waste. Yet the best medical experts agree, that, by taking proper precautions there is little reason for sickness, and that many diseases which now number their victims by the millions could be readily stamped out.

Health studies and health conditions must be given first place and foremost attention in our public schools. People must be made to understand that soundness of body is fundamentally essential in business, art, literature, politics and religion, as well as in warfare, sports and industry. By creating an enthusiasm for health promotion and physical perfection a long step forward will be taken towards the realization of that better state for all people towards which the world is blindly groping. A popular, nationwide Crusade for Good Health is imperative. Governments can do much, but the main essential is an aroused and active interest on the part of every individual citizen. The prolongation of health is the only real, lasting and basic national policy for any country.

Japs Plan To Raft Timber From B. C.

Think Davis Structure Will Stand Trans-Pacific Passage

A Japanese firm proposes to make another attempt to raft timber from British Columbia to Japan. They believe that the Davis raft structure, of which the outside rows of logs are laced with cable, can be made to stand the trans-Pacific passage. The first raft will leave this coast about August. It will have a superstructure of piled logs, strongly laced. Hitherto rafted logs have not withstood long sea journeys, except one which was taken from San Francisco to China about twenty years ago. Favoured by calm seas the raft was safely landed. The Chinese, however, unused to big logs, took ten years to cut up this boom, using long, hand rip saws to make the boards.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very considerable medicine for children in regulating the infantile system and maintaining a strong condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Canada's Huge Wheat Area

Prairie Provinces Have More Than Ninety Per Cent. of the Wheat Acreage.

The total area sown to wheat this season in the Dominion of Canada is estimated at 18,654,100 acres, an increase of half a million acres over the 1920 area, constituting a new record for this grain. Seven hundred and nine thousand one hundred acres of this is seeded to fall wheat, leaving 17,945,000 to be sown this spring.

The prairie provinces have more than ninety per cent. of the Dominion's wheat acreage, with 17,418,900 acres. This shows an increase of 572,000 acres over the previous year.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

Crossing Stock With An Automobile.

If a motorist runs down a pig it is sure to be a bloodied Berkshire, remarks the Boston correspondent. Every chicken slaughtered is a pedigree bird worth \$40 to \$50. A yellow barnyard cur is a wire-haired fox terrier. A calf is always of Alderney or Guernsey blood—in fact, nothing seems to improve stock like crossing it with an automobile.

Fiction is less strange than the truth because we miss it often.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Mrs. W. Beesley, Millie Roche, Ont., writes: "I have used Baby's Own Tablets for the past eight months and would not be without them. I used them for indigestion and teething. Baby is getting his teeth without any trouble whatever. I highly recommend the Tablets to other mothers." What Mrs. Beesley says thousand of other mothers say. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus giving a comfortable and indigestion-free condition. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

"Equinoctial" a Myth.
That the equinoctial storm is a myth is demonstrated by an astute co-operative observer of the United States Weather Bureau, says the Scientific American. This popular belief is probably the result of teaching handed down from father to son. Old weather saws are very hard to eliminate.

Manitoba Free Press Crop Report.
The Manitoba Free Press crop report, published June 7th, states that crop conditions are, if anything, more favorable than at May 17th. "It would be difficult to think of a more generally satisfactory report of conditions spread over so wide a territory," says the Free Press.

New Camera's Great Range

Can Photograph From Height Where Airplane Is Invisible.

Scientists of the United States Bureau of Standards revealed the details of a new photographic process but recently perfected. The discovery is expected to be of tremendous military value to the air service, as well as to have incalculable scientific and commercial application. It will give to the eye of the camera power which nature has never endowed to the human eye, for it will be possible for airplanes to make photographs from heights so great that the planes themselves will be invisible from the earth, and to penetrate haze that the human eye cannot pierce.

A black mare came to my place on about the 15th of June Halter and rope right hind foot white. Looks to be about 3 or 4 years old. Owner can have same by paying for this ad. and pasture. See 32-34-4 J. H. Fancher. 24tf. up.

NOTICE
REWARD offered for information leading to the recovery of one Bay mare Black mane and tail may have sucking colt now. Wt. about 1400. Age 6 years, left hind foot white Branded N on left hip. Brand may not be visible N. W. 4-35-4 John A. Connah. 23-25 pd.

Sounding Lake

A very enjoyable afternoon was spent at Horse Shoe School on Wed. June 15th when the children gave a concert in aid of the Junior Red Cross which was well attended by the parents and others. The sum of \$7.60 was collected and much credit is due to the teacher and children for the splendid way in which, songs, recitations and drilling exercises were rendered.

contributed

COMMENT

A recent case of cattle driving in this district having come to our knowledge, in which the owner did not recover the complete herd for several weeks, and in which he (generously, we consider) waived his right to prosecute, though ample proof of the offender's guilt had been secured, we deem it to be opportune and instructive to publish the following extracts from the Criminal Code, which may act deterrently to others similarly inclined to take the law into their own hands:

Sect. 70. Everyone who counsels...another person to be a party to an offence of which that person is afterwards guilty is a party to that offence.....

Sect. 392. Every one is guilty of an indictable offence and liable to three years imprisonment who,—

(a) without the consent of the owner thereof fraudulently takes, holds, keeps in his possession.... or fraudulently causes or procures, or assists in the taking possession.....of any cattle which are found astray.

Sect. 501. Everyone is guilty of an offence.....and liable on conviction to a fine not exceeding one-hundred dollars, or to three months imprisonment, with or without hard labour, who, wrongfully and without lawful authority, with a view to compel any other person to abstain from doing anything which he has a lawful right to do..... Intimidates such other person by threats....of injuring his property.....

Will Oppose Renewal Of Anglo-Japanese Treaty

Said That Premier Meighen Will Use His Influence to Have Treaty Denounced.

London.—The advisability of renewing the Anglo-Japanese Alliance, a question in which Canada is vitally interested, will be the first subject before the conference of Prime Ministers in session here.

Premier Hughes, of Australia, interpreting the public sentiment of his country, will urge renewal, but Premier Meighen is also certain to throw the whole weight of his influence toward having the treaty denounced. The Canadian premier was willing to support a renewal of the Alliance providing it could be shown that such renewal was necessary to British interests, but it has become clearer that no vital empire interest is involved and there is a strong sentiment here, both in Government circles and in the press, against the treaty, he has practically determined to fight against renewal to the utmost of his power.

The Premier of Canada will base his opposition to the treaty on three grounds: First—That the reasons which made it necessary in 1911 have since disappeared.

Rotarians at Edinburgh

Many Countries at Rotary Convention Held in Scotland.

Edinburgh.—It was reported at the annual convention of the International Association of Rotary Clubs, that there were represented at the session 669 clubs from the United States, 33 from Canada, 31 from Great Britain and Ireland, 5 from Cuba, 3 from South America, and 1 from India.

Prior to the beginning of the business session, Frank Weddon, of New York, led the delegates in the singing of popular songs, thus upholding the unconventional nature of the assembly.

A Farewell Gift

Wives of Cabinet Ministers Present Gift to Duchess.

Ottawa.—The wives of the federal cabinet ministers presented as a farewell gift to the Duchess of Devonshire, a silver casket with the Canadian coat of arms enamelled thereon and lined with gray satin. The presentation was made at Government House by Lady Foster, wife of the acting premier. Lady Foster expressed the regret of the cabinet ministers' wives over the departure of Her Excellency and their appreciation of the tender sympathy shown during all the times of storm and stress through which we have passed together."

German Haircuts Up.

Berlin.—Germany is being forced into an alliance with the Bolsheviks. Berlin barbers are to blame. They announced that on account of high labor cost, price of haircuts and shaves will be boosted 20 per cent.

COULDN'T DO HOUSEWORK

HEART SO'BAD

Many women become run down and worn out by household cares and duties never ending and sooner or later find themselves with weak hearts and shattered nerves.

When the heart becomes weak and the nerves unstrung, it is impossible for a woman to look after her household or social duties. The least little exertion or excitement leaves her in an exhausted condition, and not fit to do anything.

On the first sign of any weakness of the heart or nerves, you will be wise if you take a course of Milburn's Heart and Nerve Pills.

Mrs. Daniel Beazanson, Logansville, Minn., writes: "I am troubled with a weak heart for nearly two years. I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me."

My heart was so bad at night I could not sleep; I would take smothering spells, and I was so weak I could not do my housework. I tried to get relief with various remedies. A friend advised me to try Milburn's Heart and Nerve Pills. I have used six boxes, and I am completely relieved. I think they are the best medicine for heart trouble there is."

Price 50¢ a box at all dealers or mail order on receipt of price by The T. M. Martin Co., Limited, Toronto, Ont.

Second—That renewal of the treaty would be regarded as a challenge to the United States where the Harding administration and the new Congress have just taken a step in the direction of disarmament, and,

Third—that the formation of special alliances is antagonistic to the spirit of the times and to the endeavor that the world is making toward disarmament and peace.

In this attitude Mr. Meighen is certain to encounter strong opposition. Premier Hughes has been talking and giving interviews to the British press and is demanding the treaty be renewed. He urges, of course, that it be framed in such a way as to be satisfactory to the United States, but few here believe such a thing to be possible. The Australian Premier's strong card will be the attitude which Premier Meighen is almost certain to adopt on the question of naval defense. The Canadian Premier urging that this question be postponed until the next constitutional conference.

Would Be Serious Matter

Invalidation of Grain Act Would Make Chaos in Canada.

Moore Jaw.—A chaotic condition of affairs would exist in the country should the Canada Grain Act be found unconstitutional, is the opinion expressed by Justice Hyndman, chairman of the Royal Grain Inquiry Commission. In discussing the legal status of the commission and the Grain Act, His Lordship pointed out that the situation would be similar to that which would exist should the Temperance Act be found unconstitutional. In such event, any person who wished to would be able to peddle whisky without interference from the law. If the Canada Grain Act was found to be ultra vires of Parliament, this condition would obtain in the grain business. This information has been forwarded to Hon. Dr. Tolmie, who accompanied Premier Meighen on his mission to England.

Airmen Block Smugglers

Official Announcement State Mexican Aviators Doing Good Work.

Mexico City.—Mexican aviators patrolling the Rio Grande border are declared to be doing good work in the apprehension of smugglers according to an official announcement. They are keeping up a rigid inspection from Piedras Negras to Matamoras. To date most of their captures have been persons bringing tobacco into Mexico.

Printers Strike Money.

Toronto, Ont.—Eighteen thousand dollars in strike money was handed out at the Labor Temple to members of the Typographical Union on strike. Married men receive \$25 a week, single men \$20 and apprentices \$12. Union leaders report that seventy employers have signed up with them conceding the forty-four week.

Treaty Money For Indians in North

Edmonton.—The Indian treaty party distributing government money to the Mackenzie River natives comprises six men, with H. A. Conroy at their head and will be in the north till the end of August. The party is travelling on a house boat towed by the Hudson Bay power boat Hubac. Side trips will be made up some of the smaller streams by canoe. About \$10,000 will be paid out in treaty to the Indians north of Fort Providence. The money was sent ahead to Port McMurray in care of the Hudson's Bay Company and is now being taken with the party for disbursement along the way. The itinerary of the treaty cashiers will extend to Fort McPherson, at the end of the line, this being the first time that the Mackenzie River tribes have ever been included in the scheme.

Re-Elected By Acclamation

Hon. C. A. Dunning, Provincial Treasurer, who was returned by acclamation to represent Moose Jaw County in the Saskatchewan Legislature.

B. C. Would Restrict Japanese Immigration

Victoria.—The Provincial Government, through Premier Oliver, has forwarded to the Rt. Hon. Arthur Meighen in London, a cablegram strongly urging that any renewal of the Anglo-Japanese treaty should preserve to Canada the right to restrict Japanese immigration, something which the existing treaty does not stipulate. In connection with this subject, Hon. E. G. Barrow, minister of agriculture, has collected data showing to what extent Japanese and Chinese are engaged in the business of agriculture and horticulture in this province. This information has been forwarded to Hon. Dr. Tolmie, who accompanied Premier Meighen on his mission to England.

Greek Offensive Beginning

British Reserves Relieving Division On Sea of Marmora.

Constantinople.—Opening of the Greek offensive against the Turkish Nationalists in Asia Minor is to be imminent. British reserves are relieving the Greek eleventh division at Ismid, on the Sea of Marmara, which is proceeding to the Ushak front, near the Bagdad Railway, northeast of Smyrna. The allied high-commissioners here have authorized the Greek fleet to operate from Gallipoli, at the southwestern end of the Sea of Marmara, up through the Bosphorus and along the Black Sea to Bakum on the Georgian coast. The Greeks have assigned to this work a squadron consisting of 25 warships.

Ice Cream Is Luxury.

Ottawa.—In a judgment issued, the Board of Railway Commissioners refused the application of the manufacturers of ice cream that this commodity should be placed in the second class for express purposes and not in the first class as at present. In rendering his judgment, Chief Commissioner F. B. Carvell declares that ice cream is essentially a luxury.

B.C. Forest Fires.

Victoria.—Forest fires in British Columbia during the last week brought up the total for the season so far to 158, according to the report of P. Z. Caverhill, chief forester.

Patronize your local merchant and thereby help to build up your home town and community.

For Stiff Neck And Sore Throat

Immediate relief comes from rubbing Nerviline over the stiffened lower part of the neck. Rub in deeply—lots of rubbing helps. Nerviline reaches the congested parts at once, relieves tightness, takes out the soreness. A bottle of Nerviline in the home relieves a hundred ills, internal and external. Used for nearly half a century, as a general household remedy. Large bottles 35c at all dealers.

Old-Time Yarns in the West

By O-G-E-M-A-S-E-S (Little Clerk).

(Copyrighted)

I was managing the Fairford Post of the Hudson's Bay Company in the winter of 1874-5 and was fortunate enough to own a splendid train of dogs that I have mentioned in former sketches. Mr. Isaacs Cowie at Manitoba House was my immediate chief and at his request I took a young sleigh dog to train with my own as they had a peculiarly fast slinging gait which covered the ground in an amazing way.

I had occasion to visit Manitoba House, or the Post as it was commonly called, and started early one morning in the dead of winter, hitching up the strange dog with my own. As I was taking a cariole and traveling light, I intended riding all the way and dressed very warmly accordingly. My dogs were not at all pleased with the interpose, and quite often would give him a sly nibble, hind to which he would naturally retaliate, and this made the train go even at a faster pace than usual. We were about fifteen miles out from Fairford and well towards the centre of the frozen lake, when feeling tired and cramped I called a halt and got out of the cariole for a few minutes to stamp about and bring the circulation back. Turning my back on the dogs for a minute I heard a clash of bells and off they went in a flash, fortunately in the right direction. Running at top speed, I managed to keep near them for several miles, but noted with dismay that they were gradually gaining ground and I was blown also sweating profusely, as I had far too many clothes on for a dog-runner. I stopped and rested a minute or two, then taking off my heavy coat jogged along at a steady pace. But gradually the train drew further and further away until lost to sight, and then I had only the marks of their claws on the hard drifted snow for a guide, and even these gradually disappeared as some light snow was falling. My eyes closed and I verily believed I would have been fast asleep in two minutes, but I found my right hand holding something and on holding it to my sleepy eyes lo and behold, it was a little frozen mouse, one of the kind with long noses. Goodness knows how ever had got out here at least twelve miles from the shore, but on gazing at him a sudden conviction can cover me that if I once fell asleep I would be like the mouse in a few hours—frozen stiff. With that I stilly regained my feet, piled up my heavy coat, muffer and mittens on the head for wolf bait!

A young Indian was riding in the cariole and told the following story: "I went out on foot to visit a line of wolf traps and on getting near the last one on the east side of the lake I noted some large animals walking round it. When they caught sight of me they came tearing in great bounds and thinking they were wolves I prepared to defend myself with an ax (the only weapon I carried). But when I saw they were dogs I then knew these were the train that had ran away from Ogemase, and my, but they were glad to see me and licked my face and hands. On going up to the cariole I found Mr. Cowie's dog in my trap with a solidly frozen foot and the harness still on him. So as he would be of no further use, I knocked him on the head for wolf bait."

On examining the dog harness I noted that three of the belly bands were chewed in half, and on telling this I at once realized what had happened. Nero, my second dog, was a slim, thin haired creature with a very small head and could get out of his traces at any time by simply slipping the collar over his head. Then he apparently had set to work and released his brother one by one, leaving the unfortunate stranger to his own devices.

(To be continued)

Raising the Standard

Manitoba May Insist on Higher Qualifications for Teachers.

Winnipeg.—A movement has been launched to raise the standard of education in Manitoba by insisting on higher qualifications for public school teachers. A couple of years ago the province was short of teachers. Today, according to those in touch with the situation, there are plenty to go round.

Under these circumstances it is believed the time is opportune to raise the standard.

British Sends Warning To Turks.

Constantinople.—The British have warned the Turkish Nationalists that any attempt to take Constantinople will mean war with Great Britain.

The purpose of sending a British brigade from Malta to relieve the Greeks at Ismid is to frustrate any such Nationalist attempt to occupy Constantinople.

New Rotary President.

Edinburgh.—Dr. Crawford C. McCullough, of Fort William, Ont., was unanimously elected president International Association of Rotary Clubs now in session here for the ensuing year.

France Hindering Silesian Adjustment

Lack of Co-operation is Producing Serious Situation.

London.—Great Britain, in a further communication to France on the Silesian question delivered through Lord Hardinge, British ambassador to France, calls attention to co-operation in the restoration of order in Silesia, and declares that the lack of concerted action is producing an increasingly serious situation. Great Britain suggests that all the British troops in Silesia be placed under British command which would involve the relinquishment of French military control at some points. It is explained that this would have the effect of freeing more British forces for independent action.

Corns, Warts, Bunions Painlessly Removed

Don't limp any longer, don't suffer another hour from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Puiman's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute, use every where.
